Wil, FYI- - - (related to recent inquires)

DOGM's last activity dealing with Ashley Creek Phosphate's large mine notice of intention (file M/047/027) was a meeting held here at DOGM with David Aro on March 16, 1995. David was representing Ashley Creek Phosphate and was investigating the current permit status for this large mine notice and what would be needed to complete the process.

DOGM's last activity dealing with the exploration project (file E/047/010) was a letter sent March 23, 1992 regarding some clarification to the exploration notice of intention submitted by Ashley Creek Phosphate Company on March 16, 1992. Jerry Mansfield of State Lands was copied on that letter. No response to that 1992 letter is found in the exploration file.

LET ME KNOW IF YOU NEED COPIES OF ANYTHING OR MORE INFO.

CC: TMITCHELL, SALDER
